Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The active claims are 1-16.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujimori (USP 7,009,942) in view of Fellman (6,980,990).

Details of the rejections have already been set forth in the last Office action. The details are incorporated herein by reference thereto.

Response

Applicants admitted that Fujimori teaches a connection setting apparatus for setting connections between a plurality of apparatuses connected to a network. Applicants argue for patentability that Fujimori does not teach recognizing a first device that has been connected to a network without being assigned a nickname. The Examiner disagrees. As admitted by Applicants, Fujimori teaches setting connections between a plurality of apparatuses connected to a network. As indicated in the previous Office action, Fujimori further teaches automatically assigning a name specific to an apparatus when the apparatus was connected to a LAN (column 8, lines 27-33). Fujimori teaches recognizing a first device that has been connected to a network without being assigned a nickname because in Fujimori a name is assigned when the apparatus is connected to a network LAN. If a name has already been assigned to an apparatus before it is connected to a LAN, there is no need to assign a name when the

apparatus is connected to the LAN. Applicants fail to explain why Fujimori does not teach recognizing a first device that has been connected to a network without being assigned a nickname.

As to the remarks directed to Fellman, Applicants admits that Fellman teaches a user is able to select one or more names from a table and to register the name after it is selected (page 4, lines 9-10). Applicants contend that Fellman teaches selecting name by a user whereas the claims recite automatically select. The examiner relies on Fujimori for that teaching. The Examiner relies on Fellman for the teaching of table and registration.

As to the remarks directed to claims 5-8 and 16, Applicants fail to explain why they disagree with the Examiner's rationale.

Newly Cited Reference

Hayes (USP 7,155,305) is relevant. Hayes is cited for the teaching of SSPD (column 7, line 62) and Uniform Resource Name (URN, column 5, line 3).

Final

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2155

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
